

HAZARD CABLE RAMPS (PRODUCT CODE: CR/500 RANGE)

KEY FEATURES – Protect cable/hoses – Solid rubber – Large choice of sizes

Solid Rubber Traffic Cable Ramps take all types and volumes of traffic when bolted securely in place. Our steel “clamp” fixing plates can be fitted at any point along the ramps leading edges. Installation is simple, there's no marking out, you simply drill through the holes in the plate, 14mm for concrete and blocks and 13mm for asphalt and tarmac.

The CR10 Extruded Rubber Cable Ramp has a 60mm wide and 30mm deep central slot for cables running throughout its length. We offer a free cut to size service to ship the cable ramp to the exact size for your site. The black and yellow ramp in the correct hazard warning colours gives drivers the maximum warning that they are approaching a speed/cable bump. It is also important to use warning and speed limit signs to control and enforce safe speeds.

Manufactured in a Solid Rubber EPDM Compound similar to tyre stock for a long service life. Supplied from ½ metre up to a maximum of 3 metres in one piece. Longer ramps will simply have a butt joint. Taking the shape and following the camber of the road, the solid rubber cable ramp can be installed in minutes. Security collars can also be used on the anchor bolts making the cable ramp tamper proof.

There is a Wide Choice in all Black Rubber Extruded Cable Ramps to protect everything from office cables to warehouse and site traffic. The product is solid rubber with an integral slot that can be easily split along the base to accommodate cables with moulded plugs. Designed for installations that need to be simply laid in place.

Ribbed Rubber Matting can also be simply laid over cables of various sizes allowing pedestrians to walk over safely. 3mm thick and 1200mm wide, the rubber matting provides a safe solution and can be supplied in lengths of up to 10 metres.

SPECIFICATION

Choice of fixings:

- a) Clamp ground plate(s)
- b) Pre-drilled top fixings, see right

Design Life 10 – 15 years
 Solid rubber takes all types of traffic
 Excellent resistance to salt and ozone
 Temperature range –30c to 60c
 Self-coloured rubber UV stable
 Hardness 70 to 75 shore
 Heavy-duty construction

Colour Options	Size Options
Black and yellow	Slot size 60mm x 30mm x 3.00 metres
All black	Slot size 19mm x 9.00 metres
	Slot size 25mm x 4.50 metres
	Slot size 45mm x 3.00 metres

FREQUENTLY ASKED QUESTIONS

How large a range of cable protectors is available?

Everything from small office cables to extra large irrigation hoses are covered by our range. For more information, give us a call.

Should warning signs be used with cable protectors?

Yes. Sturdy 'A' frame warning or traffic signs printed with important safety messages for pedestrians and traffic are available. DfT and safety colours, the freestanding signs are the correct hazard warning colours for internal and external applications and all can be supplied by Hazard. Call for more details.
